THE RETROTECHS LAUNCHES MANAGED SECURITY SERVICES THROUGH PARTNERSHIP WITH MX LOGIC

Managed Email and Web Security Services Provide Customers with First Line of Defense to Prevent Threats from Entering Managed Networks

Atlanta, GA — January 28th, 2008— The RetroTechs, the Southeast's premiere IT services provider, today announced that it has finalized a partnership with MX Logic® a leading managed security services provider. This partnership enables The RetroTechs to provide managed email, web security and message archiving services.

The RetroTechs is adding MX Logic Email Defense Service and MX Logic Web Defense Service. These new hosted offerings provide customers with an effective first line of defense at the network perimeter to prevent vulnerabilities and threats such as spam, worms and spyware from entering a managed network. In addition, The RetroTechs will be offering:

- MX Logic Message Archiving to allow businesses to store, monitor and retrieve all inbound, outbound and internal emails for compliance or general storage/retrieval purposes.
- MX Logic Message Continuity to allow customers to continue using email during planned or unplanned outages through a Web-based email client. The service provides 60 rolling days of storage to protect against prolonged outages.
- MX Logic Fail Safe Service that provides five days of rolling email storage to protect against the loss of emails during planned or unplanned outages.

"MX Logic's managed security services fit well with our current offerings and our business philosophy – provide solutions that enhance customer productivity and profitability," said Joe Schum, Sales Director. "MX Logic is an ideal business partner for us. Their simple, smart managed security services are highly effective and affordable – a perfect fit for our customer base which ranges from Small-to-Medium Sized Businesses and Enterprises."

The implementation of MX Logic products will assure a better IT experience for RetroTechs customers. By thwarting spammers and spoofers, utilizing web defense to restrict surfing, and generating internet usage reports, MX Logic products keep bandwidth available for data applications.

"By offering managed security services we are helping solution providers break into the managed services market so that they can build recurring revenue streams and identify new product and solutions sales," said Ken Totura, vice president, channel sales, MX Logic. "Working with companies like The RetroTechs to offer smart security solutions, we are ensuring that end user customers can improve employee productivity and limit liability, while decreasing network bandwidth and IT costs."

About MX Logic

MX Logic is a leading provider of managed email and Web security services that deliver enterprise-grade performance without enterprise-level complexity and cost. Our easy-to-use, award-winning services reduce risk and liability, lower overall IT costs, and increase productivity. MX Logic services are available through our industry-leading partner network.
